

Our mission for CWLMS is to provide online learning experiences that positively impact students and their learning. We are a community providing stability, meaningful connections and robust learning activities. We inspire optimism and hope for a bright future. We are an alternative middle school that offers virtual and in person instruction. We serve students from various backgrounds such as anxiety, social, emotional difficulties or travel due to athletics or accelerated students who are independently driven. We want to work toward total inclusion, and provide high interest, active learning to entice others to participate in-person, and build connections with peers and our community. Your grant allowed us to do activities such as going to the Spokane Children's Theater and watch their Freaky Friday production. We also were able to use the funds to provide transportation to Mirabeau Park to explore our local park and bond as a team at the beginning of this school year. These experiences have also sparked many more Community Service and local exploration ideas for our school to provide for our students.

It is with deep gratitude that we thank you for supporting our mission and providing our students with these unique and meaningful field experiences.
