### Artist Statement

I did this piece mostly of my own personal experience. I did this off the thoughts you might get with depression and anxiety. I used a lot of color feeling to try to evoke emotion to the viewer, such as blue under tone in the skin and red that looks like crying, purple for anxiety and blue for depression/sadness. Lastly, I did the hands to also show outside pleasure anxiety even if it is coming from your mind.

**Status:** Exhibit only
