### Artist Statement

For the past few months, every time I rode the bus and it was dark out, I was drawn in by the neon lights that illuminated the fog with a purple glow. I had an urge to take a photo of it. I really enjoy the neon-retro art, something about the colors and the style seem so dream-like and relaxing. The lighting on the bus reminded me of that art style and I knew that I had to capture it. Everything was perfect about the moment. It was foggy and really dark out, the out-of-service bus was just waiting in the purple neon light. The photo gives off a mood of a cold yet relaxed state.
