Instructor: Jessa Morissey

Medium: Digital Photography

Artist Statement

I decided to take macro photos of spices was because I thought it would be cool to see the different colors and textures in them. In my macro photoshoot of cooking spices, I wanted as much texture in the picture as I could, so I got different types of salt and pepper and crushed some of them up so there would be varying sizes. I wanted my spices to glow vibrantly, so I chose background colors that would be high contrast to the spices.
