

NEWESD 101 Materials Support

NEWESD 101 is able to offer refurbishment for kits and provide materials support for curricula and titles that are not within the scope of offered titles in our science kit cooperative.

We have worked with districts throughout the NEWESD 101 region over the years to refurbish their school-owned curricula/kits such as FOSS, OpenSciEd and Project Lead the Way (PLTW).

You do not need to be a member of our science kit cooperative to take advantage of this service.

Have your science materials
freshened up and ready to go for next
school year!

How it works...

Any school-owned kits remain the property of the school/district.

We have refurbished kits in several different ways through the years based on the individual needs of the participating school/district:

- The kits remain at your location and you provide a list of supplies that are you are needing and we handle the rest.
- You send the kits to us for refurbishment. This allows us to make sure all materials are present (even permanent), and check for damage and/or wear.
- We can pre-package materials to your specifications or just provide like materials together. We would work with you to establish what your needs are prior to setting up a contract and beginning work.

- Kits can be refurbished multiple times throughout the year or during the summer.

NEWESD 101 Science Kit Materials Center

3808 N. Sullivan Rd.

Building D25

Spokane Valley, WA 99216

Center Hours

Monday, Wednesday & Thursday: 7:30a - 2p

(or by appointment)

 3808 North Sullivan Road, #D2...
